## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claim(s) 236-274, drawn to a method of producing heterologous polypeptide and a recombinant DNA used by the method and the transgenic plant comprising the recombinant DNA.

**Group II**, claim(s) 275-279, drawn to a vector used for inserting heterologous gene in antisense orientation.

**Group III**, claim(s) 280-291, drawn to a recombinant RNA and the transgenic plant comprising the recombinant RNA.

**Group IV**, claim(s) 292-293, drawn to a recombinant RNA complement to the recombinant RNA of Group III.

**Group V**, claim(s) 294-306, drawn to a recombinant DNA or a kit used for constructing the recombinant DNA of Group II.

The instant application contains six different products and Applicants are entitled for a first product, a method of use and a method of making, should the unity be found among them. Therefore, the instant Group I contains the first product and a method of use of the product. Groups II-V are directed to different products.

This application contains claims directed to the following patentably distinct molecules: 1) one of the polypeptides listed in claims 240, 263, 281, 293 and 297; 2) one of IRES listed in claims 241, 264, 282 and 298; the molecules are independent or distinct because they have distinct chemical structures.

Applicant is required under 35 U.S.C. 121 to **elect a single disclosed species from each of species groups 1)- 2)above** for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 236, 260, 280 and 294 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
